

# Aerial Roof & Property Inspections

Clear documentation. Fast turnaround. No ladders.

## Aerial Inspection Package

Professional drone inspections designed for roofers, contractors, real estate professionals, and landlords who need reliable visuals without climbing, delays, or added risk.

- Pre-flight review of the property
- Safe aerial inspection of roof and structure
- 15–25 high-resolution photos covering roof planes, edges, ridges, and penetrations
- Short aerial video clip (10–20 seconds)
- Clearly labeled images for easy review and sharing
- Digital delivery via secure download link

**Turnaround:** 24–48 hours (often sooner)

## Common Uses

- Storm damage documentation
- Roof condition checks
- Pre- and post-work records
- Property overviews for listings or ownership documentation

## Why FalconSight

Oklahoma-based and locally operated. Inspection-focused services with clean, usable visuals built for documentation, backed by reliable communication and fast delivery.
